

Biomolecular Machines Laboratory <http://bionano.cent.uw.edu.pl>
at the Centre of New Technologies University of Warsaw has an opening for a

post-doctoral researcher

to work as an experimentalist in the *OPUS* project funded by the Polish National Science Centre "*The effect of crowded environment on the catalytic activity and dynamics of viral proteases*"

We are looking for motivated candidates:

- with a PhD degree in (bio)physics, (bio)chemistry, biology or related discipline,
- with the knowledge of the experimental biochemistry or biophysics methods,
- experience in experimental studies that include isothermal titration calorimetry and spectroscopic techniques will be beneficial.

We offer:

- contract with the University of Warsaw and salary from the National Science Centre in the *OPUS* project for up to three years,
- work in a group whose research bridges the fields of physics, chemistry and biological sciences.

To apply:

- send your CV and a short cover letter explaining why you would like to join our group to Joanna Trylska joanna@cent.uw.edu.pl (PDF is the preferred format).
- Applications should be in English and contain a record of scientific career and achievements (any previous research experience, participation in conferences, list of publications) and the name of two researchers willing to issue recommendation.
- Top candidates will be invited for an interview (or a conference-call). Good command of English is required.

Applications will be accepted until the position is filled.

Please include in your CV: "*In accordance with the personal data protection act from 29th August 1997, I hereby agree to process and to store my personal data by the Institution for recruitment purposes.*"
