Center of New Technologies is a new interdisciplinary, scientific unit of the University of Warsaw focused on research and development. Our mission is to contribute to society well educated leaders of science who will provide important research. We are based on close inter-relationship between teaching, scholarship, and research. By supporting young researchers we would like to provide important and innovative solutions to the society in the field of new technologies, computer sciences, medicine, environmental protection, industry and agriculture.

We are now looking for suitable candidate for the following position:

**Associate Professor**

Working in the field of:

Bioinformatics, structural biology and genomics

**Key words:**

Bioinformatics, structural biology, systems biology, next generation sequencing

**Research themes and methodology:**

- Development of bioinformatics tools
- Structure, function and evolution of proteins and their interactions with ligands
- Application of next generation sequencing in genomics

**We offer:**

- An associate professor position in a new and dynamic research centre at the University of Warsaw
- Contract of employment, full-time job
- Laboratory space and computing facilities
- Basic equipment and services
- Organisational support
- Post and salary corresponding to experience and qualifications (according to university rules of employment)
- A friendly, inspiring and interdisciplinary working environment
- Further career development
Requirements:
- applicants must have a PhD and adequate post-doctoral experience
- distinctive scientific achievements
- preference will be given to candidates who have experience in gaining financial support (grants) for their research
- ability to form a research group and develop national and international collaborations

Applications, consisting of:
- a curriculum vitae with a list of publications
- a copy of your PhD diploma
- a list of scientific achievements and further plans
- a letter of intent (5 pages long)
