GUIDELINES FOLLOWING THE RECEIPT OF INFORMATION ABOUT A
POSITIVE TEST RESULT FOR SARS-COV-2 VIRUS AMONG STUDENTS AND
EMPLOYEES OF THE ORGANISATIONAL UNITS
AT THE UNIVERSITY OF WARSAW

1. Follow the applicable "Procedure for responding to incidents of SARS-CoV-2
infection"

2. All enquiries regarding COVID-19 should be made via the sanitary inspection hotline
on: +48 22 25 00 115

3. Isolation i.e.: seclusion of a SARS-CoV-2 positive person takes 7 days if the patient
has not developed COVID-19 symptoms.

4. Duration of quarantine if no COVID-19 symptoms occurred during quarantine:
   - for those who have received a referral for testing from a primary or night care
     physician, ends with a negative result and lasts no longer than 7 days,
   - for those returning from abroad is 7 days.

5. During quarantine, if there are any worrying signs of illness, contact the clinic and
   arrange a teletreatment with your GP.

6. Quarantine is suspended for the duration of the test, based on a referral (travel to the
   swabbing site and return home). Suspension of quarantine or isolation also occurs when
   it is necessary to visit a doctor. In these situations there is no obligation to report to the
   sanitary authorities.

7. Mandatory quarantine is not applicable:
   - persons cohabiting with a person in quarantine,
   - persons fully vaccinated against COVID-19 (if the quarantine has been imposed due
     to a roommate's illness, the vaccinated person's quarantine will only be lifted once
     they have a negative test result),
   - recovering persons, i.e. persons who have had COVID-19, not later than 6 months
     after the date of a positive diagnostic test for SARS-CoV-2 (if the quarantine was
     imposed due to the illness of a roommate, the quarantine of the recovered roommate
     will only be lifted when the roommate has a negative test result),
   - persons cohabiting with a person on isolation who have themselves completed
     isolation within the last 30 days.

8. Details of the quarantine and isolation rules are available on the website:
